## JUNE 2017: LATEST GREATER GREEN VALLEY CERT NEWS

---

MONTHLY MEETING :: CERT Meeting June 28th: (Topic) Flood Response.

The training topic, in anticipation of the Monsoon, will be Flood Response. Ken Drozd, National Weather Service, Tucson Office, admitted during his talk at the May meeting that the monsoon forecast for this year is a bit hazy, i.e. we may or may not have heavy rains. But, we mustn't wait for more clarity. We will revisit Tucson area floods that have occurred since 1983 and then discuss what our role as a Community Emergency Response Team should be if a significant flood does happen this year. If you would like more information about the monsoon forecast you can watch a Tucson Weather Service video or read about in their monthly publication, the Coyote Crier.
